- Frontend Development:** Responsive, accessible, user-friendly interfaces.
- Backend Development:** RESTful APIs, authentication, real-time data handling.
- Mobile Apps:** Cross-platform apps using React Native.
- Data Analysis:** Data processing and insights for business decisions.
- AI Solutions:** Predictive analytics and natural language processing.
- Tools:** Git, GitHub, CI/CD basics.

## SOFT SKILLS

- Strong problem-solving and critical thinking.
  - Excellent communication and teamwork.
  - Quick learner, adaptable, and reliable.
  - Professional, energetic, and client-focused.
- 

## PROJECTS

### ***liquourlogic.co.ke*** – Point Of Sale Web & Mobile Application

A live POS web and mobile application for inventory management and reliable client support across Kenya. Technologies used include ReactJs and Firebase.

### **Smart Task Manager** – Software Used in AlphaNex Limited

Took part in the development of Issync workspace responsible for managing and tracking employees tasks distribution, leave tracking and payrolls.

### **Advanced Social Media Sentiment Analysis** – Tool for classifying tweets as either positive or negative using NLTK.

Developed a software tool with the capability of classifying all tweets including sarcastic and tweets in all local dialects listed in Google Translate into positive or negative sentiments, providing concrete insights based on the classification.

### **Machine Learning Projects**

Built multiple ML projects hosted on my Google Collab.
